EASY TO CLEAN SEATING

Cleaning a surface simply removes visible debris, dirt, and dust. Sanitizing a surface makes that surface sanitary or free of visible dirt contaminants that could affect your health. Sanitizing is meant to reduce, not kill, the occurrence and growth of bacteria, viruses, and fungi. Disinfecting a surface will "kill" microscopic organisms as claimed on the label of a particular product.

EASY TO CLEAN SEATING

FOR A NEW WAY OF THINKING ABOUT OFFICE DESIGN

Recommended CDC Guidelines To Combat COVID-10:

- Detergent of Soap & Water (prior to disinfection).
- 1:5 Bleach/Water Solution.
- Alcohol-Based Cleaners (at least 70% Alcohol).
- Quaternary-Based Disinfectants.
- Hydrogen-Peroxide Based Cleaners.

For additional information on COVID-19, please visit [CDC.gov](https://www.cdc.gov).

Download the OfficeSource Cleaning & Care Instructions, [right here](#).

Note: As always, when using any disinfectant, it is important to test a small area and do not saturate the surface of the fabric, and remove all residue with a clean, damp cloth so the surface of the fabric will not be damaged.
